### **ABSTRACT**

In the Modern Society, the role of competitive specialist is highly appreciated. But to be a competitive specialist is not common. It burdens a specialist to sustainable development, self-study and work at himself continuously. We know. In the process of acquiring knowledge, gaining experience the role of teacher is very important and honorable. At the same time, it demands them to be an expert in their subject. How should they become expert? How should they be competitive? In this article, the concepts on developing professional competency of teachers, and the key notions associated to this field have discussed and analyzed from the scientific point of view in the example of Mother Tongue (Uzbek language) and Literature teachers.

**Keywords:** Professional training, development, skill, comprehension, needs, demand, didactic, communication.
