ABSTRACT

Independent work of students is designed to strengthen and deepen the knowledge gained during the training sessions, to prepare for future exercises, and to develop a culture of self-reliance. Independent work includes studying the lecture material as a type of learning process, studying the texts under study, studying proposed teaching literature, practical exercises, exams, outputs, scientific notices, and science referrals.

Keywords: Student Independent Work (TFI), "independent work" self-reliance, "independent work with independent literature", "learner", "diligent learner," "hard-working".
