### ABSTRACT

The training of highly qualified scientific personnel at leading universities and research centers has always been recognized as one of the strongest sides of the development of society. In accordance with the reform of the system of training highly qualified personnel, the issue of adaptation is raised new technologies in education are introduced. The process requires the preparation and assessment of students 'competence and the level of graduates' competitiveness, both at the national and international levels.

**Keywords:** Technology, education, acme, method.
