Annotation. The article deals with one of the urgent problems of pedagogy-the formation of ideological immunity in unorganized underprivileged through the implementation of the program "Active citizen", providing for the education of hormonal personality.

Keywords: Unorganized youth, ideological immunity, spiritual and moral education, program 'Active citizen'.

INTRODUCTION, LITERATURE REVIEW AND DISCUSSION

On may 3, 2019, the President of the Republic of Uzbekistan signed a Resolution "On additional measures to improve the effectiveness of spiritual and educational work", which noted that "the country pays special attention to the systematic organization of spiritual and educational work, increase the effectiveness of measures implemented in this navravlenii, increase intellectual potential, consciousness, thinking and worldview, strengthen the ideological immunity and worldview of the population, especially young people, education hormone-developed generation in the spirit of patriotism, love and devotion to the people» [1].

Further, the decree stated that "when the world is experiencing an acute ideological struggle and intensifies the threat of spirituality, still there are cases of neglect of youth to national values, getting her under the influence of alien ideas, entry on ignorance on the path of crime and extremism" are Particularly vulnerable is the so-called unorganised young people who because of some reasons could not trudoustroitsya and assumes that its activities in an academic or industrial staff [2,3].

In this regard, the necessity of work with unorganized youth on the formation of its ideological immunity, providing for the activities of perosmysleniyu goals, objectives, content, technologies related to the implementation of their spiritual and moral education [4,5,6].

In the context of the above we have developed a program "Active citizen", aimed at improving the ideological immunity of the unorganized youth by developing the moral core of the person through the education of patriotism, the formation of moral categories and concepts, the activation of moral consciousness, moral and civic position of the individual. Likewise, the formation of citizenship, moral and legal culture of students, contributing to the development of kriticheskogo osmysleniya their own and other people's actions, vyrabotke active life position, ability to correctly assess slojivshuyusya the situation and determine the best moral choice.

In the conditions of intensification of development of society, change of ecological situation and increase of mental and physical loadings there is an urgent need for formation at youth of health-saving behavior for harmonious development by formation of health-saving skills, awareness of value of health and formation of a healthy lifestyle promoting the prevention of addictive(dependent) behavior.

At present, this development of society, the transition to a market economy are very relevant issues of economic thinking and the acquisition of legal knowledge for the organization of professional activities, skills of development of their own business and business plan.

Intensive rates of social production development dictates the need for continuous improvement of spiritual and moral education, implemented in the course of specially organized seminars and trainings conducted with unorganized youth through the formation of their strong ideological immunity.

In the shaping program developed by us, designed for 18 hours, special emphasis is placed on the development and implementation of debates, excursions, conversations, quizzes, discussions, thematic evenings, military-Patriotic games in accordance with the logic of the process of Patriotic education of teenage children.

Form: work; individual and group, Used methods of formation of consciousness, method of persuasion, example, in the form of conversations, debates, excursions, lectures, stories, class hours, quizzes.

Work can be conducted one to two times a week for 45-60 minutes in your free time and be on a voluntary basis, the inclusion in the active position, the creation of situations of success, the development of creative potential.

The purpose of the program: to increase the level of formation of ideological immunity of young people, the development of all components of social and psychological activity.

Program objective:

- to give the necessary amount of knowledge about civil and Patriotic ideals, principles, norms, responsibility, rights and duties of citizens;
- to cultivate a sense of respect, pride, responsibility to the country and society, to promote tolerance;
- instilling in young people a sense of love for their Homeland, respect for national traditions and culture;
- to develop a clear civil position, as well as readiness for conscious and voluntary compliance with the civil position;
- expand the social choice possible;
- to develop independence, initiative in the performance of civil, Patriotic and social roles, skills and abilities of the right of measured behavior, participation in public activities;
- "include" a young person in social life
- to promote the acquisition and expansion of knowledge about Uzbekistan, its history, traditions, etc.;
- to form in adolescents and young men a sense of belonging to the history and responsibility for the future, to instill love for their native land;
- to form an active life position on the basis of self-knowledge (personal and professional);
- to form health-saving knowledge, skills and culture of a healthy lifestyle;
- to form legal culture and legal consciousness;

-to form economic thinking and entrepreneurial skills.

Basic principles of the "Active citizen" program»:

the principle of the integrity of semantic equality. The mentor and the pupil have a common goal, an interesting joint activity, the same views on universal values, positions of equality. Leading in relation to adult and child is the principle: "although you are also a child, but the same person as me; I respect you. We do business together»;

the principle of continuity and consistency of educational impact at all levels of continuous education; the relationship between the processes of education and training;

conceptual principles of joint education (democratization, humanization);

taking into account the laws of psychophysiological development in adolescence and adolescence, providing a personality-oriented approach to the education of adolescents and young men;

the principle of organization and self-organization of the readiness of the subject to education (human activity, motivation, problematic situation of choice and decision-making, willingness to cooperate, creativity and communication);

the principle of development-the path of the educational system at such stages, as the origin, formation, maturity and transformation.

In the implementation of the program of Patriotic education of teenage children "Active citizen", contributing to the formation of ideological immunity, the following effective educational chain is used:

-love for parents, home, family and close people;

-education and respect for elders, to people of work (familiarizing children with the traditions of the people, the desire to honor the memory of the fallen soldiers, a manifestation of respect for the elderly) ;

-the love of mother nature (environment);

-my homeland –Uzbekistan (expansion of ideas about our Homeland-Uzbekistan, education of love to the homeland) ;

-a person is a defender of his Fatherland (love, care and preservation of his homeland, the formation of a sense of patriotism, respect and sympathy for other peoples, pride in the National army, the desire to serve his Fatherland) ;

The commandments, on the basis of which the program on ideological immunity of youth is based, are implemented according to the following principles:

-appreciate and protect your Fatherland;

-master, improve and preserve the traditions and culture of your people;

-cherish the history of your people;

-sacred to the symbols of your country;

-believe in yourself and realize your possibilities;

-live healthy when healthy;

-be the master of your destiny and organize your business.

Expected result. In the process of implementation of the program of Patriotic education of youth by the end of the program should be formed the following qualities of personality:

-active civil position;

-the ability to take personal responsibility for the fate of his family, city, homeland;

-a sense of patriotism, loyalty to the Motherland and readiness to serve the Fatherland;

-spirituality, morality, personal and social responsibility;

-the ability to self-development.

The program of Patriotic education of teenage children "Active citizen" is presented in the table.

Table
