Faculty of Preschool and Primary Education, Bukhara State University

ABSTRACT

The globalization of information space, the intense flow of new knowledges, put before the educational system a number of problems associated with obtaining and using information received from various sources. In this article the necessity of search of modern approaches to the development of independent critical thinking of students, in particular by attracting media education resources is explained.

Keywords: Assertiveness, critical, media education, external dialogue, self-awareness, argument.
