ABSTRACT

At present, the role of laws and principles in the development of oral speech of hearing impaired students in the educational process is being created and applied in practice by state requirements. In this regard, in this article, important recommendations on the role of legalities and principles in the development of oral speech of hearing impaired students in the educational process are outlined.

Keywords: Law, oral speech, principles, special educational-material, moral-spiritual and aesthetic conditions, the pace of social and scientific-technical development.
