ABSTRACT

The economic competence of the leaders of preschool educational organizations is becoming one of the leading criteria in assessing its adaptation to new life realities, one of the ways to solve the problem of increasing and achieving the given quality of teacher education, increasing the competitiveness and professional mobility of the leader in the labor market. A modern leader should be a qualified specialist, well knowing not only his activities, but also capable of versatile professional and socio-cultural activities, creative self-development.

Keywords: Education, competence, competence, economic competence, economic tasks, advanced training.
