

ESSENCE, CHARACTERISTICS, DIDACTIC PRINCIPLES AND TYPES OF DISTANCE LEARNING

Kamalov Azamat Farkhodovich
Teacher at Kokand Pedagogical Institute

ABSTRACT

The development of the Internet - global computer network, has opened up new prospects for improving the global educational system. Currently the Internet has a large number of specialized educational networks located all over the world, including Uzbekistan. The USA, Canada, Japan, Eastern European countries have significant experience in using the Internet for the purposes of higher and secondary education. As for the Uzbek education system, the role of the global Internet network is growing.
