

ABOUT COPIES OF UBAYDULLAH'S WORK "MUQADIMMAT US-SALAT"

Murtazaev Abror

Professor of Tashkent State University of Uzbek Language and Literature named after Alisher Navoi

ABSTRACT

The study of Uzbek literature reveals the number and weight of literature in the Turkish language, which is still not fully studied. Although the work of poets and writers has done a great deal of scientific work on the social situation of the period in which they lived, they do not fully shed light on the history of the past. In particular, if we take the literary environment of the XVI century. This period is considered by some historians to be a period of depression¹. At first glance, it seems that there is a soul in this idea.
