### **ABSTRACT**

This article emphasizes the importance of learning and teaching modern foreign languages. The existence of oral and written speech problems in the formation of communication skills in French by primary school students and the ways to overcome them and the factors that provide the ability to learn the language easily and quickly is described. The role of communicative competencies is important for students to communicate effectively and well in a foreign language. Oral communication competence is now widely recognized as an important object of teaching.

**Keywords:** Communicative competence, oral and written speech development, methodical choices, strategies, oral competence and foreign language didactics, Neurolinguistic approach, cognitivism.
