ABSTRACT

Language is a comparable and complex term stemming from the different ways it is researched, learned, utilized in the digital age. Language reflects thought and can include any form of synchronous or asynchronous communication that leads to negotiation of meaning which may include not the only the words we speak, write or listen to but also language gestures, signs, and symbols in off-line or online communication in the digital age.

Keywords: Technology-Assisted Foreign Language Learning (TAFL), Technology-Assisted Second Language Learning (TASLL), Digital Age, Distance learning.
