ABSTRACT

Students who have confidence in their abilities can deal with all regulations and policy changes, while students who are less confident in their abilities will tend to have difficulties in dealing with all the changes that exist in school. In psychology it is known as "Self Efficacy". This study aims to find out the general description of academic self-efficacy in class XI students at SMAN 14 Bekasi. This research was conducted on 175 class XI students at SMAN 14 Bekasi. The research method used in this study is a non-experimental quantitative method, namely a descriptive study type. From the results of the analysis, there are 30 items whose correlation coefficient values are greater than 0.30 with the Spearman formula. Based on the results of the study, it can be concluded that the general picture of academic self-efficacy in class XI students at SMAN 14 Bekasi, is at a moderate level.

Keywords: Descriptive Study, Self Efficacy, Academic Field.
